THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1. The Transformer Plant of Koch und Sterzel [redacted] developed a 6 Mev. betatron for the Soviets. The work was started soon after the plant was dismantled in 1945 [redacted] and was halted in June or July 1948. The work was done as part of the Soviet reparations program. The Soviet office SKTB (Sonder Konstruktion Technologisches Buero), which was in control of this work, was located in the Koch und Sterzel plant. This office contained German designers but their names were kept secret. [redacted] these designers finished the plans. Some construction work was done; in fact, perhaps most or all of the construction was completed. It was never tested, however. [redacted]

The plans and equipment were packed up and shipped to the USSR in June or July of 1948 and SKTB was dissolved at the same time. [redacted]

2. The Transformer Plant of Koch und Sterzel is now trying to develop a second betatron. No construction work had been started on this one as of August 1952. They have been thinking of building one since the Soviets moved the first one out, but all the facilities have been needed for other work. The effort has picked up some this year and [redacted] they might complete the job in 1953. The betatron
